Irresistible Learning: (Fire and Ice)

Science: properties of materials.

This week we are looking at what material would be suitable for a fire fighter to wear. First of all, we want to make sure that the material is waterproof. Find some different materials in your home such as Clingfilm, foil, a sponge, bubble wrap, a plastic bag or a cloth and put these over a jar or bowl. Then pour water onto the material and see if it leaks through. If no water gets through the material then it is waterproof but if the water does leak through then it is not waterproof.

Log onto bug club and explore the books you have been allocated. See if you can complete the quizzes.

Wellbeing – RHW – Families

This week in RHW we are thinking about our families and how we show them that we care. This could be through the words we say, small gifts we might buy or through acts of kindness. Think of something that you could do to show someone in your family that you care. You could help them to complete a household task, offer to do the washing up or even just tell them how much they mean to you!
